

CARE &  
MAINTENANCE

COCO  WOLF

MADE FOR LIFE. OUTDOORS

# MATERIALS CARE

At Coco Wolf, we strive to balance inspiration with innovation, creating collections shaped by expert craftsmanship, a commitment to timeless design and a deep connection to outdoor living.

We carefully select high-performance materials, many inspired by the marine industry, chosen for their ability to withstand the elements while maintaining their integrity over time.

Our approach is centred on effortless outdoor living without compromise, designing pieces that are not only enduring in quality, but also easy to care for and maintain.

## WHATEVER THE WEATHER...

Coco Wolf furniture is designed for year-round outdoor living, inspired by high-performance maritime design. Using hardwearing, water-resistant materials, each piece is crafted to be low maintenance and built to last.

Frames are made from Iroko, a durable hardwood naturally resistant to decay. It adapts to changes in temperature and humidity, helping to minimise cracking and splintering. Exposed timber is finished with a scratch and weather-resistant varnish for added protection against the elements, scuffs and stains.

Each design is engineered for efficient water management and quick drying. Discreet drainage channels prevent water pooling, while a marine-grade mesh base improves airflow and drainage. Ventilated seat backs, breathable acrylic fabrics and quick-draining cushion inners all work together to ensure comfort returns quickly after rain.

All metal components are rust-free, including stainless steel fixings, ensuring long-term durability outdoors.

## COMFORT AND DURABILITY THAT'S SECOND TO NONE

Coco Wolf furniture cushions are designed for superior performance year-round outdoors.

The pad's internal structure is highly breathable and water-permeable, providing a quick-drying action that's ten times faster than standard polyurethane foam and polyester fibre cushions.

The mouldproof, antibacterial and chlorine-resistant filling is ideal for marine or seaside locations. Fully stress tested (to 80,000 compressions) and engineered for comfort.

# TIMBER

Our frames are made from Iroko, a hardwood chosen for its strength and exceptional durability. It expands and contracts in response to its environment, helping to reduce the risk of cracking or splintering.

Naturally resistant to decay, it is widely used in the marine industry for its ability to withstand the elements year after year.

All exposed wood is finished with a UV, weather and scratch-resistant lacquer, available in 11 different colours.

## CARE & MAINTENANCE

### Day to day

Our timber is easy to maintain. Simply use a damp cloth to remove any build-up, then dry with a soft cloth. Avoid using solvent-based products, as these may damage the lacquered finish.

### Over time

To address dents, marks or worn areas, Coco Wolf provides a touch-up kit and matching lacquer to suit your furniture's wood finish.

Follow the steps below:

- Lightly sand the affected area where needed, then use the touch-up kit to repair the dent.
- Once complete, apply the wood lacquer using the brush provided or a soft cloth.
- Allow the lacquer to dry (approximately 15 minutes), then gently buff with a clean, lint-free cloth, following the direction of the wood grain.
- Repeat as needed to achieve the desired finish, allowing four to six hours drying time between coats.

# FABRICS

Coco Wolf has curated an exclusive selection of high-performance fabrics to complement its collections, combining advanced technology with refined design for year-round outdoor use across a variety of environments.

We offer a comprehensive range of plain and patterned fabrics, sourced from some of the world's leading mills. Each fabric is carefully selected to suit both contract and residential applications, including a range of FR-treated options.

All fabrics in the Coco Wolf collection are solution-dyed acrylic, engineered to deliver exceptional durability and long-lasting performance. Inherently resistant to fading, as well as mould and mildew, they are designed to withstand exposure to pool and seawater.

They are also stain resistant, breathable, bleach cleanable and easy to maintain, ensuring lasting comfort and practicality in outdoor settings.

## CARE & MAINTENANCE

### Day to day

Vacuum regularly to remove loose dirt and keep fabrics looking their best. Spills should be addressed immediately. Sponge the affected area with a solution of mild detergent and water, allowing it to soak into the fabric. Rinse thoroughly with clean water and allow to air dry.

### Stain removal

Chlorine bleach will not affect the colour of solution-dyed acrylic fibres and can be used for more stubborn stains, including mildew. We recommend a diluted solution of one part bleach to five parts water. Always rinse thoroughly after cleaning.

# HANDWOVEN ROPE

The handwoven rope used in our Coronet collection is specifically made for outdoor use. Marine standard materials result in a product that is highly resistant to the wide range of outdoor elements, including UV rays, incremental weather, abrasion, chlorine, and saltwater.

The rope is 100% polyester, has antibacterial properties and is dyed in compliance with Oeko-Tex regulations and is also completely recyclable.

## CARE & MAINTENANCE

Day to day

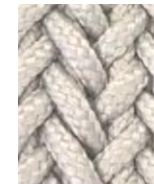

To clean the dirt and dust that may embed between the rope weave, simply wash the furniture with low-temperature water and allow to air-dry naturally. Neutral PH soap solution can be used to effectively clean residue or marks.

# PORCELAIN & STONE

The hard-wearing and versatile qualities of porcelain stoneware make it an ideal choice for our table collection. Impressive surface hardness withstands wear and scratching, high loads and high temperatures, while being resistant to chemicals and colour change.

## CARE & MAINTENANCE

Day to day

Remove dust by using a dust control cloth or a damp cloth. The surface can be cleaned with a Ph Neutral detergent, using a clean cloth.

Stain removal

If there is a spill, remove fresh stains as soon possible with an absorbing cloth, use a stone cleaner solution and simply wipe off with a wet sponge.

General protection of porcelain surface to extend its lifespan

- Prevent collisions with the most exposed points like corners and edges.
- Avoid using metal or abrasive pads.
- Do not use knives with a ceramic blade because the hardness of the two materials is very similar.
- Do not place extremely hot objects (such as frying pans, pots, coffeepots, etc) directly on the surface.

# MARBLE

Beautifully cut from high-quality marble sourced from Italy, this natural material offers a durable and refined surface, ideal for both indoor and outdoor living and dining spaces. Exceptionally hardwearing, marble brings a timeless quality to any setting.

As a porous stone, our honed marble tabletops are sealed with Lithofin MN Stain-Stop, creating a water-resistant barrier that helps prevent stains from penetrating the surface.

## CARE & MAINTENANCE

### Day to day

The protective seal helps prevent the absorption of most liquids, provided spills are cleaned promptly. For regular care, simply wipe the surface with a damp cloth. For a more thorough clean, use a mild detergent solution. Avoid using scouring pads, as well as abrasive or ammonia-based cleaners, limescale removers, or products containing acetone, chlorine or solvents, as these may damage the surface and cause it to appear dull or marked.

### Stain removal

In the event of stains from liquids or grease, remove immediately using an absorbent cloth dampened with lukewarm water. Clean gently to avoid scratching the surface.

### General protection of marble surface to extend its lifespan

Protect the surface and do not leave potted plants or flower arrangements on the table for a long period of time, as it can be potentially corrosive. Do not put hot dishes directly onto the surface of the table. Spillages of products that contain acids such as lemon juice, red wine, perfume, bleach or industrial cleaning agents, these should be wiped as quickly as possible and then cleaned as above.

### Every six month or yearly (depending on the use of the table)

While the sealants can last for over a year, it is impossible to predict the life expectancy of any surface treatment to stone. Coco Wolf suggest resealing after the initial six months and then once a year if the table top is in regular use.

### Commercial use:

Depending on the usage as described above we recommend that a professional stone cleaning company is contracted after the initial six months to inspect the surface and on-going at least once a year to deep clean the stone surface and reapply the seal if required.

## COVERS

To help extend the life of your outdoor furniture, Coco Wolf offers tailored rain covers designed to protect your pieces during periods of non-use, particularly over the winter months.

Each cover is crafted from an advanced nanotechnology fabric. This 230gsm, three-layer, 100% polyester material features a specialised water-resistant coating, offering long-term protection while remaining breathable, durable and flexible. The fabric also helps to prevent moisture build-up on cushions overnight.

**Covers should only be fitted when the furniture is clean and completely dry.** When ready to use, simply remove the covers and your setting is ready without the need for additional cleaning.

Each cover is tailored to fit individual Coco Wolf designs for ease of use. Embroidery can be customised with a brand name or logo. Available in grey.

## CARE & MAINTENANCE FOR COVERS PURCHASED AFTER JUNE 2024

Clean with a mild detergent and water solution, then line dry. Covers may also be machine washed. Recommended washing instructions:

- Machine wash at 30–40°C using non-alkaline detergent
- Do not bleach
- Do not tumble dry
- Do not iron
- Line dry only

## WARRANTY

Our PF fabric covers include a three-year warranty covering materials and manufacturing under normal use. For any claim, a tag number is required and covers may need to be returned for assessment.

## CARE & MAINTENANCE FOR COVERS PURCHASED BEFORE JUNE 2024

Clean with a mild detergent and water solution, then line dry. These rain covers cannot be machine washed.

- Do not machine wash
- Do not bleach
- Do not tumble dry
- Do not iron
- Line dry only

## WARRANTY

Our PF fabric covers include a three-year warranty covering materials and manufacturing under normal use. For any claim, a tag number is required and covers may need to be returned for assessment.
